FLOORING EXCELLENCE

WOOL LOOP COLLECTION  
BUTTERWICK

Our versatile 100% wool carpet made from fine 4-fold yarn - available in a palette of contemporary natural shades.

Available in 5 widths:  
**1.00m, 3.66m (12ft), 4.00m, 4.57m (15ft) & 5.00m**

Method of Manufacture:  
**4 Fold Loop Pile**

Pile Material:  
**100% Wool**

Colour Palette:  
**7 Natural Shades**

This product is produced using natural undyed yarn and this may result in colour variation.

DESIGN STYLE

**BUTTERWICK**  
 Luxury Rating: **LC5**  
 End Use Classification: **Class 23 /33**  
 Tuft Density\*: **71,920 per m<sup>2</sup>**  
 Total Carpet Thickness\*: **10.5mm**  
 Tog Rating\*: **1.52 tog**  
 \*+/- 10% commercial tolerance

FLOORING EXCELLENCE

# THE UNIQUE ADVANTAGES OF A WESTEX CARPET

## Allergy Guard

Allergy Guard protects against pests, bacteria and allergens whilst Fresh Guard inhibits mould and neutralises pet odours. All Westex Carpets have an anti-dust mite treatment applied to protect against house dust mites, mould fungi and bacteria and their allergens, fresh guard is also part of the construction of this treatment.

The active ingredient in the treatment does not allow the debris (human skin, hair etc.) to decay into the food that the dust mites thrive upon, thus there is no environment for them to exist or thrive in. This will also inhibit the bacteria and mould development. Thorough vacuuming will then maintain the cleanliness of the carpet.

## Fresh Guard

This treatment has been subjected to the full rigours of scientific testing, both toxicologically and ecologically, to establish that there is no harm to human or pet health, or the environment. It is tested to OECD 404 and 406 to qualify as no irritation or sensitisation.

These treatments combine with the wool fibre on a permanent basis and will last the life time of the carpet.

## Stain-Resist

All Westex Carpets have a Stain Resist treatment applied. Stain Resist is not a stain blocker. Stain Resist slows the stain penetration down, giving time to get the carpet cleaned. The stain resist formula bonds with the fibre to provide protection against dirt and damp, therefore making caring for the carpet easier.

This treatment prevents stains from penetrating the fiber and they temporarily remain locked on the surface so they can easily be removed. The breathable properties of the fibre are not affected.

Shampooing and professional carpet cleaning products cannot break the bonds between the active chemical and fibre. The performance of the Stain Resist will last 5 years, subject to normal, reasonable use.

Stain Resist is free from CFCs and is dermatologically tested. The Stain Resist polymers show no toxicity even at the highest applied levels and no bioavailability, metabolism or hydrolysis.

## Moth Guard

All Westex carpets have a mothproofing treatment applied. Mothproofing protects your carpet against the attack of both moths and other wool eating insects. The active ingredient in the moth-proof makes the keratin (a protein found in wool) that moths, bugs and other insects thrive upon, indigestible. They literally starve as their digestive systems are unable to convert the keratin they have eaten into usable food.

The moth-proof combines with the wool fibre on a permanent basis and will last the life time of the carpet.

Westex's award winning moth-proof process has had scientific testing, both toxicologically and ecologically, to establish that there is no harm to human or pet health with no effluent waste.
