FLOORING EXCELLENCE

discover the beauty of wool.

The beauty of wool is not merely aesthetic, but fundamentally practical. The inherent characteristics of the fibres; warmth, softness and insulation, are maintained from field to floor. Plus, the bulk and springiness of wool naturally reforms after any compression, and the natural oils and scaled structure of the fibres offer inbuilt

stain resistance. The combination of durability and softness makes wool the natural choice for premium carpet manufacture. Add to that the fact that wool is an entirely sustainable material (annual shearing is vital for animal welfare), a Westex carpet is one of the most environmentally sound choices you will make.

80% Premium Wool Blend
with 20% nylon for improved
recovery, resilience & durability

excellence at every step.

Our Heitage

Our roots are firmly planted in sheep farming and the textile heartland of West Yorkshire. Westex was originally founded by a master dyer who wanted to offer a wider range of colour and quality within carpet manufacture.

We still draw on and develop that legacy today, weaving luxury and durability into our carpets by utilising the best blend of wools, spinning techniques, dyeing and tufting processes. Every style and every colour is designed in-house at our dedicated manufacturing sites in West Yorkshire, ensuring excellence at every step for your carpet.

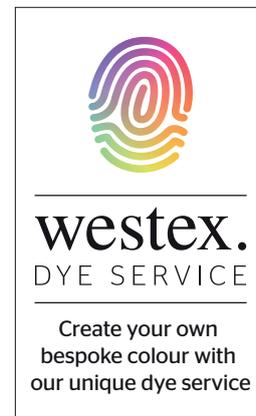

Our products

Axminster carpets are crafted using a traditional weaving technique that delivers exceptional durability, luxurious texture, and unmatched design clarity. Manufactured from the finest wool and wool-blend yarns each carpet begins with a detailed digital design, followed by expertly dyed yarns in rich, accurate colours. Every tuft is individually selected and woven into place, creating crisp patterns and dense, long-lasting construction. The carpet is then sheared, backed, and carefully finished for strength and stability.

Axminster carpets combine timeless craftsmanship with modern precision - perfect for luxury hospitality, commercial interiors, and elegant residential spaces.

Markets

For nearly 40 years, Westex has supplied and manufactured high-quality flooring solutions to both commercial and residential marketplaces. Our floorings are widely used around the world in the hospitality sector in the homes of royalty, stately homes, prestigious retail outlets and on the sets of blockbuster movies

Colour

With 100's of colours available in the Westex core ranges, you'd be forgiven for thinking that's where our colour range ended. At the Westex dye house, our expert colour technicians offer a Special Dye Service to match any colour, for a truly unique solution.

Samples

Samples of all the designs and colourways illustrated can be produced in the form of "Kibby" carpet samples (to represent colour and design only). These are usually available within 72 hours. Please note that whilst every effort is made to accurately replicate designs in a Kibby format, this is not fully representative of the finished woven product. Some allowance therefore must be made to take account of the visual differences which may occur depending on the design selected and the quality produced.

Quality Selection

The qualities detailed represent specifications which should satisfy most commercial requirements. With each particular installation, the decision on which quality is most appropriate will depend on the levels of traffic, colour and design as well as the length of time the carpet is expected to be installed. Westex have many years experience in these considerations and can provide detailed advice on quality selection on a project by project basis.

Planning and Estimation Service

Using the latest Callidus planning software, Westex can accurately estimate carpet requirements from site plans to any scale. Accurate estimations can be calculated and adjustments made to minimise wastage. One critical area of importance is seam placement. Knowledge of customer flow through the building is used to guide the installer in the careful positioning of seams to avoid premature wear.

General Installation Recommendations

All patterned carpets should be installed in accordance with BS5325:2001 Installation of Textile Floor coverings and NICF Manual detailing industry best practice.

General Maintenance Recommendations

Westex recommend that this carpet is maintained in accordance with an agreed maintenance schedule which should include the following:

- Vacuum regularly.
- Remove spills immediately.
- Professionally clean as required.

Pile Reversal

All cut pile carpets can suffer from pile reversal and in certain instances this may become permanently bent or distorted for no specific reason that research has yet identified, giving areas of light and shade. This is also described as "shading" or "watermarking". It is not a defect in manufacture; it only occurs in a small percentage of all carpets and no liability whatsoever can be accepted by the manufacturer in respect of it.

Pile Pressure

All cut pile carpets are liable to show light and dark patches resulting from disturbance of the pile created by foot traffic or brushing. This is a normal feature and is not a defect in manufacture and no liability whatsoever can be accepted by the manufacturer in respect of it.
